

SRD240x

Precisionscreen are Launching the latest addition to the their Washing Plant range with the introduction of the Mobile SRD240X. This machine is an all in one wash plant boasting all components required for processing Sand products. The SRD240x incorporates similar features used on the successful SRD180 plant by way of the Dual Bucket wheel, large weir area and submerged screw. These original features are coupled with new ideas delivered on the one movable machine.

The new wash plant can be easily moved between sites if needed on its road registered chassis. The plant can be tailored built to suit each application and you have the option of selecting the individual components you need.

- 2 Deck Screenbox with wash kit
- Dual Bucket Wheel
- Drying Vibrating Screenbox
- 41m Linear Weir overflow for collection of fine sand
- Submerged Screw to recover fine sand
- Cyclone feeding back onto drying screen
- On board Catwalks hydraulically folding
- Built on road towable dual axle trailer
- On board diesel/hydraulic powerpack
